Internet Tools: Security Software

You're managing email address: **emailname@cox.net** **emailname@cox.net** | [Logout](#)

Internet Tools

Protect your personal computers and your family from viruses, hackers, spyware, pop-ups and unwanted content with our free software. Cox High Speed Internet provides PC based software that offers Anti-Virus, Firewall, Parental Control, Anti-Spyware and Pop-Up Blocker protection. You can choose all the protection the software provides, or just the protection you need.

System Requirements: The Cox High Speed Internet security software requires a minimum of Windows 98 Second Edition® with Internet Explorer 5.5.

Installation and Activation Instructions

(Please read completely)

- By clicking the link below, you will begin the installation and activation process.
- By clicking the link below, you agree that your Cox account number and Cox.net email address will be sent* to Authentium, Inc. in order to activate your software and allow them to provide support.

[Install and activate Cox High Speed Internet security software](#)

**Your Cox account number and Cox High Speed Internet e-mail address is provided to Authentium solely so that they may activate and support your software, and so that Cox can track activations between Cox and Authentium. Authentium will not use any of the information provided for marketing and will not distribute it to any other parties. For more information, please see the Cox [Privacy Policy](#).*

Mac users: Please note that the Cox High Speed Internet security software is only available

Account Summary:
emailname

Services:
Cox High-Speed Internet

Includes:
Webmail
7 E-mail Addresses
10MB Personal Webspace

 to Windows users. For more information on securing your Apple® computer, visit <http://www.apple.com/security>. Anti-spyware will detect existing spyware on a PC but will not prevent future spyware infections. Pop-Up blocker will significantly reduce pop-ups, pop-unders and adware, but is not guaranteed to prevent all unwanted ads.
